Ambient Collection (Matt)

INSPIRATION & DESIGN

The Ambient collection offers a new ceramic interpretation of cement, a cornerstone of modern and contemporary architecture, a mix of engineering strength with expressive essentiality.

Our endless in-dept materials R&D, technical capability and craftsmanship has led to a new collection that reinterprets its original source in a minimalist way, mixing superior performance with aesthetic appeal.

The result are surfaces with excellent performance that, seen from distance, gives the impression of being solid color with a slight ripple while, looking closer, they are distinguished by a slight grit perceived by our hand.

A proposal originally designed for the most demanding architects, looking for the best of contemporary Italian inspirational design in every type of setting and location.

Lucido Opaco Marble Surface

INSPIRATION & DESIGN

Lucido Opaco is an iridescence (a play of lustrous) modulations on surfaces devised by Nexion's research and development team, leveraging on its artisan mastery. The company has created the **new Glossy-Matt surface**, specially designed to emphasize the graphics of precious marbles.

The new surface is based on different digital layers which returns **a glossy and matt finishing** according to the different visual angle. A visual complexity that translates into the perception of a half iridescence on different levels of reflection and enhanced, in the presence of grazing light on the surfaces.

(*Lucido means **Gloss** & Opaco means **Matt**)

Spazzolato Marble Surface

INSPIRATION & DESIGN

Thanks to Nexion ongoing research and development on new materials, the company has devised a **new brushed finishing** inspired by the traditional marble sandblasting technique.

The surface is distinguished by **a feeling of softness**, embellished **with a delicate hollow** and relief engrave graphic typical of real marble.

A new visual effect with a tactile consistency also amplified and fully enhanced by its grazing light conditions on surfaces.
